Summary

Aspiring Machine Learning and Generative AI enthusiast pursuing B.Tech in Artificial Intelligence and Data Science. Proficient in Python, data science, and core machine learning concepts, with hands-on experience building ML models and AI-driven applications. Passionate about leveraging Generative AI, LLMs, RAG, API Integration and advanced analytical techniques to create intelligent systems that solve real-world problems.

Education

Indian Institute of Information Technology, Design and Manufacturing, Kurnool *Aug 2024 – Jul 2028*
B.Tech in Artificial Intelligence and Data Science *Kurnool, India*

Experience

Infosys Springboard *Nov 2025 – Jan 2026*
AI Intern *Remote*

- Engineered an AI-powered Research Paper Review & Summarization Tool to automate analysis and insight extraction; built independently within a 20-member AI development cohort.
- GitHub: AI Powered Review System

IBM SkillsBuild *Dec 2025 – Jan 2026*
AI/ML Intern *Remote*

- Automated lecture note creation by constructing an AI pipeline with speech-to-text, NLP summarization, and Generative AI; personally tested and optimized 5+ key system parameters for peak performance.
- GitHub: Lecture-Lens

Projects

Scholarium | GitHub | *AI-Powered Adaptive Learning Platform*
Tech Stack: React 18, Django REST Framework, PostgreSQL, MongoDB, Gemini 2.0 Flash, Anthropic Claude, JWT, Gunicorn

- Developed a full-stack generative AI platform delivering personalized DAG-based learning roadmaps via LLM prompt engineering with Gemini 2.0 Flash Preview; integrated Anthropic Claude as a high-reliability fallback.
- Architected a hybrid database layer (PostgreSQL + MongoDB) for relational state management, LLM response caching, and token telemetry; reduced redundant API calls using MD5-hashed prompt caching.
- Built a RESTful API with Django REST Framework and JWT authentication (SimpleJWT), serving a React 18 SPA with React Flow DAG visualizations and Framer Motion UI animations.
- Designed an anti-memorization assessment engine with binary-scored MCQs, per-session analytics, and knowledge gap tracking; deployed via Gunicorn + WhiteNoise with environment-driven production config.

Technical Skills

Languages: C, C++, C#, Python
Frameworks / Tools: Streamlit, Unity
AI / ML Libraries: NumPy, pandas, Matplotlib, Seaborn, NLTK, Scikit-Learn
Developer Tools: Git, GitHub, VS Code

Achievements

Agentica 2.0 Hackathon — Secured **6th place out of 240+ teams**; demonstrated rapid prototyping, problem-solving, and collaborative teamwork in a high-pressure technical environment.

Certifications

Beginning C++ Programming – From Beginner to Beyond *(Udemy)*
Master Git and GitHub in 5 Days *(Udemy)*

Languages

English (Fluent) Telugu (Fluent) Hindi (Fluent)
